***Allowable Subject Matter***

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The independent claim 1 recites "continually subtracting, from a current fluid remaining useful gear shift life value, incremental reductions in fluid remaining useful gear shift life due to current shift energy input to determine a reduced fluid remaining useful gear shift life value for use as current fluid remaining useful gear shift life value in the next processing cycle of said computer". This feature in combination with the remaining claimed structure avoids the prior art of record.

U.S. Patent 5,777,211 to Binienda et al. presents similar subject matter; however, shift energy is not calculated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patent Application Publication US 2004/0117147 to Hirthe et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Cherry whose telephone number is (571) 272-2272. The examiner can normally be reached on M-F 8:00-4:30.
